

Problem Solving

This is a fundamental and widely applicable topic.

Addressing quality control problems in the manufacturing process to ensure Nitro bikes meet high standards. This may include implementing stricter quality checks and revising production procedures.

Enhancing the customer service experience, such as quicker response times to inquiries and more effective issue resolution, to build trust and loyalty among Nitro bike owners.

Solving supply chain challenges to reduce lead times and costs for bike components. Exploring alternative suppliers or optimizing logistics to streamline operations.

Innovation and Product Development

What topics are urgent to discuss?
What is blocking our progress?

Developing a new line of electric bikes to cater to the growing demand for eco-friendly transportation options. This may include advanced battery technology and smart features.

Collaborating with popular social media influencers and cyclists to showcase Nitro bikes and their features. This can boost brand visibility and credibility.

Introducing a bike customization service where customers can choose colors, accessories, and features to create personalized Nitro bikes, appealing to a broader customer base.

Marketing and Promotion

What should we discuss as a full group during this meeting?

Creating engaging content like how-to videos, biking tips, and user-generated content to build an online community of bike enthusiasts and potential customers.

Participating in bike expos and local cycling events to showcase Nitro bikes, network with potential customers, and get direct feedback for future product development.

Identifying areas where Nitro's employees can improve their skills through training and development programs, ultimately boosting the company's expertise and efficiency.

Personal Development and Goal Setting

What should we discuss as a smaller group at the end of this meeting?

Setting ambitious sustainability goals for Nitro as a company, encouraging employees to take ownership of eco-friendly initiatives both in the workplace and their personal lives.

Participating in bike expos and local cycling events to showcase Nitro bikes, network with potential customers, and get direct feedback for future product development.

Creating clear career advancement paths for employees, setting goals for individual and team achievements, and providing opportunities for growth within the company.
